

Amendments to the Specification:

Please replace paragraph [0058] with the following amended paragraph:

[0058] FIG. 7 is a block diagram of the apparatus for granting a randomly selected auxiliary prize; [[and]]

Please replace paragraph [0059] with the following amended paragraph:

[0059] FIG. 8 is a flow chart representing the steps and one method of playing at the game of the present invention with randomly selected auxiliary prize[.];

Please add the following new paragraphs after paragraph [0059]:

[0059.1] FIG. 9 is a flow chart representing the steps and one method of use of a standard deck of cards and a playing layout for the game of the present invention; and

[0059.2] FIG. 10 is a flow chart representing the steps and one method of use of a standard roulette gaming device and a playing layout for the game of the present invention.

Please add the following new paragraphs after paragraph [0155] :

[0155.1] Referring now to FIG. 9, there is shown a flow chart representing the steps and one method of use of a standard deck of cards and a playing layout for the game of the present invention. The method of use comprises using a standard deck of playing cards 200 and using a betting layout having areas for cards of the deck of playing cards 202. A player places at least one gaming bet, each gaming bet choosing a number n of betting cards displayed on the layout 204. A payout-determining playing card is randomly selected from the standard deck of playing cards, the payout determining card being any one card from the deck 208. When the random selection matches one of the n betting cards, a payout is calculated 210 using the payout determining card for the player for each gaming bet, the payout amounting to $48/n$. Optionally, the player

makes a securing bet choosing a number s of the playing cards as bet securing cards 206, wherein the bet securing cards allow the player to modify a casino house income ratio.

[0155.2] Referring now to FIG. 10, there is shown a flow chart representing the steps and one method of use of a standard roulette gaming device and a playing layout for the game of the present invention. The method of use comprises using a roulette gaming device having at least roulette numbers 1 to 36 and 0, two types of markers and a betting layout for a roulette casino game 220. A player places at least one standard bet using a first type of the markers, each standard bet choosing a series n of betting numbers displayed on the layout of roulette numbers 222. The player then places a securing bet using a second type of the markers, the securing bet choosing a series s of the betting numbers as bet securing numbers, wherein the bet securing numbers allow the player to modify a casino house income ratio 224. A payout-determining number is randomly selected from the set of roulette numbers, wherein the payout determining number is any one of the roulette numbers 226. When the payout-determining number matches one of the n betting numbers chosen, a payout is calculated 228 using the payout determining number, for the player, for each standard bet, the payout amounting to $36/n$.

Please replace paragraph [0157] with the following amended paragraph:

[0157] In this preferred embodiment, the auxiliary game is a bet on the player position that will be chosen by the random selector. It will be understood that other auxiliary games could be played.
